RAJ BRIX

ABOUT US

We are prepared and eager to deliver fast, professional, and on-budget paving services to each and every one of our clients. The foundation of our business operation is simple: Put the customer first and deliver a professional service that will stand the test of time.

We merge design, construction and development into a cohesive operation from inception to completion. Therefore, we are glad to introduce our company and its services to your esteemed Organization and kindly request you to include us among your list of preferred Contractors. When you select us, you are getting excellent building contractors who are highly respected, with a record of exceptional quality and impeccable service.

PROCESS OF MANUFACTURING

- 1 Sediment (sand and aggregate) is poured into the mixer
- 2 Cement is poured into the mixer
- 3 Water is transferred from the water tank to the mixer
- 4 The mixture is now created
- 5 Once the mixture is well tested for quality it is transferred to the press.
- 6 The final step is compaction.

PROCESS OF LAYERING

The soil underneath, especially if it is unstable such as black cotton soil, needs to be removed until stable ground is reached. Murrum is then back-filled and a roller compactor used to compact the soil. The last 300mm depth is filled with hand packed hardcore which is also roller compacted. Fine aggregate is laid on top then finally the paving blocks arranged and held together on the edges by the concrete kerbside.

LET US HELP YOU MAKE YOUR HOME SURROUNDING, PARKING LOT, DRIVEWAYS, PATHWAYS ETC WITH OUR QUALITY PAVING BLOCKS FROM FIXING EDGES, LEVELLING GROUND, COMPACTING TO LAYING THE PAVERS LEAVING IT NEAT AND ELEGANT.

“ADD VALUE AND TRANSFORM YOUR SPACE”

OUR PRODUCTS

Cabro paving is perfect to improve the exterior appearance of your property while also minimizing mud and dust in your compound. Increase the aesthetic appeal of your driveways with high quality paving materials from Rajbrix Limited.

PAVING BLOCKS (UNI/QUAD)

Quad/Unipave are traditional pavers suitable for residential pavements and industrial hardstand pavements.

KERB STONES

Rajbrix manufactures high quality concrete block road kerbs for effective edging and containing the concrete block paving and roadworks.

ROAD CHANNELS

Road channels are used in most common sight at the edge of many roads, especially on carriageways where cabros are used or usually laid away from the edge of a pavement as an aid to drainage.
